

# Our Patients Say It Best...

I would like to say thank you to you and your great staff for looking after me. The whole experience for me was "TOP DRAWER." Thank you. ~Edward

Dear Dr. Long, you are the model of what a doctor should be. I'm now using my chainsaw and weedeater again, which makes me the happiest man on earth. I'm doing much better following the injection." ~ Steve

In the very beginning it took a while to get in however that is true with just about any specialty. I count it a blessing to be seen by them. From the 1st visit to now going on my 6th visit! I would not hesitate to recommend them. In the event it takes you a while to be seen I would tell you it is well worth the wait!" ~ Sandra

I am very pleased with the care that I have received from everyone at the office. I especially appreciate the willingness of everyone to engage in conversation and answer questions. I am an information focussed person and try my best to understand the function and process of my neurogenic degenerative spine. That helps me cope with variability in pain, sensory experiences, and limitations on range of motion and activity." ~Anonymous

This is our first visit here - the staff and Dr. are very nice and friendly and professional. I feel very confident in their work and I would definitely recommend this practice to friends and patients." ~ Emma & Renee`

It's hard to say 'I loved it' when you're talking about getting injections in your spine. Great staff, very friendly, fun, had me completely at ease. Explained everything well, procedure was quick and nearly painless. The only pain I had, I was warned about, so it was neither unexpected or bad. Highly recommended, based on the 1st experience." ~ Marty

I found the experience to be excellent. Dr. Barsanti was friendly and concerned. He exuded thorough competence. The staff were all happy and helpful, which speaks well for a medical practice. The injections were performed painlessly and with dispatch. Overall it was one of the best outpatient experiences I have had." ~ Leo

I visited Dr. Barsanti's office for three lumbar and one cervical epidural in 2016 and twice for lumbar epidurals in 2017. Dr. Barsanti is smart, thoroughly explains everything he's doing, LISTENS and even has a sense of humor. When I go there, I'm welcomed as family - from the receptionist to the nurses to Dr. Barsanti. They are all kind, professional, knowledgeable and patient. When I go there, I KNOW I'm getting the best pain management care in the entire Richmond, VA metropolitan area!" ~ Tom

Tiffany, at the front desk was extremely knowledgeable, friendly and professional and willing to help answer any of my questions. Latisha was so pleasant and had such a calm demeanor and kept

checking on me while I was waiting for the doctor. When I met Dr. Barsanti, I knew right away I was in the right place. I could tell he cares for his patients. He was so thorough about explaining my health issues. He is a very nice man. By the time we finished our appointment I felt so comfortable being there.” ~ Brenda

I’ve seen Dr. Barsanti for steroid shots in 2013, four epidurals in 2016, and two in 2017. He’s smart, very knowledgeable, patient, LISTENS, even has a sense of humor. He knows exactly where the “shots” have to be administered in my back to relieve my leg pains which originate in my spine. Eventually, I’ll need back surgery but the pain relief from Dr. Barsanti’s work is terrific. He is, quite simply, the BEST!” ~ Tom

One trip, one injection and within 8 hours sciatica pain gone. This was about 10 weeks ago.” ~ Blaine

I was very happy with the treatment by the staff and Dr. Barsanti. Had my first cortisone shots and today my pain is much reduced.”

Dr. Barsanti is the BEST physician I’ve ever been to. He diagnosed me with RSD in my right ankle and with his treatment plan he was able to restore my quality of life again. I can never express how grateful I am for the care he provided. I would send anyone to him who is in chronic severe pain.”

Latisha has the most wonderful outgoing personality. She is truly an asset to Commonwealth Spine.” ~ Carl V.

As far as doctors go, me and my hubby really like Dr. Barsanti. His staff is great! The receptionist is so friendly. She remembered our names and remembered my hubby is a jokester. Dr. Barsanti took away my Spinal Stenosis pain on the left and I am having the procedure on the right side. I will highly recommend this practice.” ~ Cheryl.

I have been a patient at Commonwealth Pain since early 2000. Dr. Barsanti has given me a reason to live. He manages my pain to the point that I can do so many things I couldn’t do before and I would like to thank him and his staff. Most importantly he treats you like a person and not a number always with a smile on his face and listens to what you have to say that’s why I love Dr. Barsanti and staff. Thank God for them! ~ Sheila J.
